

I had such a lovely visit to Finland in April 2009 and took lots of photographs of the wonderful scenery. The snow on all the beautiful birch trees and all the piles of logs everywhere were amazing. There were fascinating patterns everywhere. I found it so inspiring seeing it all and meeting the Finnish feltmakers. This piece was made on my return to Wales.

I love feltmaking because it has so many possibilities and is so versatile. Although it is ancient art, it is developing in a very innovative way these days. I live in the country near many small beaches and these all inspire me. My visits to other countries all inspire me to create new work.
